Mustafa Mahmoud

Front-End React Developer

moustafa.mahmoudx7@gmail.com 01127434078 Cairo, Egypt

linkedin.com/in/moustafaweb github.com/moustafax7-dotcom

SUMMARY

Results-driven Front-End Developer with expertise in React.js and modern JavaScript (ES6+). Proven ability to design and implement responsive, high-performance user interfaces using component-based architecture and industry best practices. Strong focus on writing clean, maintainable code, optimizing application performance, and ensuring seamless cross-browser compatibility. Committed to continuous learning and staying up to date with the latest advancements in front-end development

PROFESSIONAL EXPERIENCE

Front-End Developer(React) Intern 11/2025 – Present
DEPI Internship
• completed intensive training in React.js for front-end development
• Built responsive and interactive user interfaces using React.js
• Developed reusable components and managed state using React Hooks
• Applied Agile/ Scrum practices during project work

Web Designer 05/2025 – 06/2025

- Completed intensive training in HTML, CSS, JavaScript, Bootstrap, and responsive web design principles.
- Specialized in building React.js-based frontend applications using component based architecture.
- Utilized Git and GitHub for version control and collaborative development Workflows.

EDUCATION

Bachelor of BIS(Department Business Technology) 09/2023 – 09/2027
Egyptian Russian University

COURSES

Olympiad Financial Security 10/2025 – 10/2025
international Competition Participant Participated in an international academic competition focused on financial security and economic awareness. Russia

SKILLS

Programming Languages: Python, Java, C++, Arduino, with hands-on experience in debugging and implementing efficient solutions. Hardware & Electronics: Arduino, Servo Motors, Ultrasonic Sensors, Breadboard, Circuit Wiring, with strong attention to detail and system analysis.
IoT & Embedded Systems: Bluetooth Communication, AC Power Switch Control, Motorized Systems, involving collaborative development and real-time problem handling.
AI & Machine Learning: Basics of Artificial Intelligence, Neural Networks, Machine Learning Concepts, focusing on analytical thinking and model understanding.
Tools & Platforms: Git, GitHub, Arduino IDE, Microsoft Office, used for version control, documentation, and effective task management

PROJECTS

Pharmacy Management System — Database Project
Project Description: Designed a relational database system for pharmacy management as part of the Database course. Modeled the system using EERD and ERD diagrams, then applied mapping techniques to build the relational schema. Wrote SQL queries to manage inventory, prescriptions, and sales data.
Technologies: SQL, ERD, EERD, Schema Mapping
